

SYSTEMS GRAPHING REVIEW

DIRECTIONS:

1. Solve each system by graphing and state the solution.
2. Describe whether the system is consistent or inconsistent.
3. Describe whether the system is independent or dependent.

1) $y = 2x + 4$
 $y = \frac{1}{3}x - 1$

2) $y = 6x + 2$
 $y = 6x - 3$

3) $13x - 6y = 48$
 $13x - 6y = -48$

4) $4x + 9y = -9$
 $4x + 3y = -27$

5) $2x - 5y = 20$
 $14x - 5y = -40$
